

CLINICAL POLICY ADVISORY GROUP (CPAG)

Derby and Derbyshire CCG Position Statement

Commissioned with Restrictions Cosmetic Procedures

Statement

NHS Derby & Derbyshire CCG will not routinely commission the following cosmetic procedures unless part of treatment for post trauma, part of planned reconstruction surgery e.g. cancer, part of the management of a congenital abnormality resulting in a serious health function deficit or for an iatrogenic* condition arising from treatment previously delivered in the NHS

- Cheek Implants
- Chin Implants
- Collagen Implant
- Earlobe repair
- Fat grafts
- Lipectomy/Liposuction
- Nipple inversion
- Facelifts (Rhytidectomy) unless part of the treatment for facial nerve palsy, cutis laxa or pseudoxanthoma elasticum)

These commissioning intentions will be reviewed periodically. This is to ensure affordability against other services commissioned by the CCG.

* The term 'iatrogenic condition' refers to a condition that was directly attributable to previous medical treatment. In this context, 'iatrogenic condition' specifically excludes known side effects of a treatment or possible complications which the patient would normally be notified about when they were informed of the benefits and risks when consenting to the original treatment."
