

## DERBYSHIRE JOINT AREA PRESCRIBING COMMITTEE (JAPC)

### Blood glucose and ketone meters, testing strips and lancets formulary

NHSE, in April 2023 undertook a detailed evaluation process to identify preferred blood glucose and ketone meters, testing strips and lancets. Using a national specification, both quality and cost were considered to develop the national recommendations. The recommended meters, strips and lancets have passed a rigorous evaluation process ensuring that only the best of the highest quality and, cost-effective devices are approved.

Based on national recommendations, JAPC has opted for 2 options per category. This is to ensure resilience in the supply chain.

In the table below are listed the **JAPC preferred options** for the patient categories. To see all the listed options please refer to the full [NHSE commissioning recommendations](#).

Category	Patient cohort	Meter	Blood glucose test strips (50 strips)	Ketone test strips (10 strips)	Lancets
1 a & b	<b>Type 1 diabetes</b>  or  <b>ketosis prone Type 2 diabetes</b>	GlucoFix Tech GK *additional functionality	GlucoFix Tech Sensors	GlucoFix Tech B-Ketone Sensors	Glucoject plus 0.2/33G
		GlucoRx HCT	GlucoRx HCT	GlucoRx HCT Ketone	GlucoRx 30G
2	<b>Type 2 diabetes</b>	On Call Extra Mobile	On Call Extra Test Strips		On Call 30G
		GlucoRx Q	GlucoRx Q Test Strips		GlucoRx 30G
3	<b>Type 2 diabetes</b> Meters and strips which are suitable for people with Type 2 diabetes that require additional functionality* See <a href="#">NHSE commissioning recommendations</a> for further details	WaveSense JAZZ	WaveSense JAZZ Test Strips		AgaMatrix Ultra-Thin 0.2/33G
		WaveSense JAZZ WIRELESS Gestational diabetes requiring GDM-Health™ app compatibility	WaveSense JAZZ Test Strips		AgaMatrix Ultra-Thin 0.2/33G
4	<b>Type 1 &amp; 2 Diabetes</b> Lancets which are suitable for the majority of people, and which are suitable for people that require additional functionality* See <a href="#">NHSE commissioning recommendations</a> for further details				

\*Additional functionality includes features such as on-board carbohydrate counting calculator, large display for visual impairment, and extra memory for Group 2 drivers.

- If either of the preferred options for categories 1 and 2 are not suitable, then any meter from the [NHSE Commissioning Recommendations](#) with blood glucose test strips costing less than £9 for 50, ketone testing strips less than £10 for 10 and corresponding lancets costing less than £4 per 100 are suitable for prescribing.
- **Supply of meters** - Any patient newly diagnosed with diabetes should be assessed by a healthcare professional and supplied a suitable meter if self-monitoring of blood glucose is required. Training on the correct use, storage and interpretation of readings should be provided.
- **Existing people with diabetes** - Where people with diabetes are already using meters that are not on the recommended list of products. These people should be offered an alternative meter at the earliest opportunity following a discussion with their healthcare professional.
- All suppliers will provide, free of charge, the recommended meters, lancing devices, and ongoing free control solutions to all healthcare settings across England in primary care, secondary care and to service users.
- All prices quoted in the commissioning recommendations are the prices contained within the drug tariff as of 1st April 2023, which can be subject to change. NHS England will continue to monitor the drug tariff prices to ensure they continue to deliver best value. Local review of preferred options will take place following National review.
- Continuous Glucose Monitoring (CGM) devices are considered separately.
- Patients on Insulin pumps will require the specific meter corresponding to the pump being used.

Included in appendices 1 & 2 are the JAPC preferred options for category 1 and 2.

Included in appendix 3 are recommended meters/strips for different cohorts requiring an additional functionality meter.

Included in appendix 4 are the contact details for local reps within Derbyshire.

June 23 v1. Link to <a href="#">NHSE Commissioning Recommendations</a> added to paragraph at bottom of page 1.	June 2024
Addition of Category 3 additional functionality meters and appendix 3 and 4.	March 2025
Local rep contact details updated	June 2025

## Appendix 1

### Category 1a & 1b - Type 1 diabetes or ketosis prone Type 2 diabetes. JAPC preferred choices

Category	Meter	Key Features		Blood Glucose Test Strips (£)	Ketone Test Strips (£)
<b>1a &amp; 1b</b> <b>All patients' cohorts requiring enhanced functionality</b>	<b>A. Menarini Diagnostics</b>  <b>GlucoFix Tech GK</b>  	Connectivity	QuickLink NFC, Bluetooth and dedicated USB cable	<b>GlucoFix Tech Sensors Test Strips</b>   £5.95 Pack/50	<b>GlucoFix Tech B- Ketone Sensors Test Strips</b>   £9.95 Pack/10
		Applications	GlukoLog Lite, GlukoLog Web & RapidCalc Bolus advise, Glooko and Diasend		
		Warnings	Hypo/Hyper alert up to six settable acoustic alarms (3 Glucose Alarms & 3 Ketone Alarms)		
		Alerts	Hypo & Hyper Alerts & four markers available		
		Sample Size	0.5µL- Glucose / 0.8 µL- Ketone		
		Reaction time	5 Seconds- glucose/ 8 Seconds- ketone		
		Display	Large, bright display, 4.8cm x 4cm		
		Meter size	10.7cm x 5.8cm x 1.35cm		
		Technical Support	<a href="http://www.glucomen.co.uk/glucofix-tech">www.glucomen.co.uk/glucofix-tech</a>		
		Other features	No coding needed, Meal markers, Extra-large memory, Strip ejector, Averages 1, 7, 14, 30, 60, 90 days
