

## **DERBYSHIRE JOINT AREA PRESCRIBING COMMITTEE (JAPC)**

### **JAPC New drug/medical devices review**

All new medicines and or new formulations are not routinely recommended for use within the Derbyshire health economy until either a national (e.g. NICE) or local review has taken place. New medicines can be referred to the JAPC by clinicians using the new drug assessment forms [click here](#).

### **Existing drugs/medical devices not included in the local formulary/traffic lights.**

It is not possible to classify all medicines listed in the BNF within the Derbyshire JAPC traffic light formulary. If a medicine/device is not listed on the traffic light system then advice should be sought from the Medicines Management Team.
