Oraya Therapy for the Treatment of Wet Age-related Macular Degeneration (AMD) Position Statement

Statement

Derby and Derbyshire ICB (DDICB) has deemed that Oraya Therapy for the treatment of wet age-related macular degeneration (AMD) should not routinely be commissioned as it falls under [NICE IPG049 Radiotherapy for age-related macular degeneration \(March 2004\)](#).

DDICB does not fund any procedure or technology assessed by NICE under their IPG unless the provider has submitted a robust, evidenced based business case to the commissioner and this has been subsequently approved. See the [DDICB IPG Policy](#) for more information.

The ICB's commissioning intentions will be reviewed periodically. This is to ensure affordability against other services commissioned by the ICB.
